DETAILED ACTION

1. This Office Action acknowledges the applicant's Amendment A, presented as Paper No. 6. Claims 1, 3, 6-8, and 10 are pending in the application.

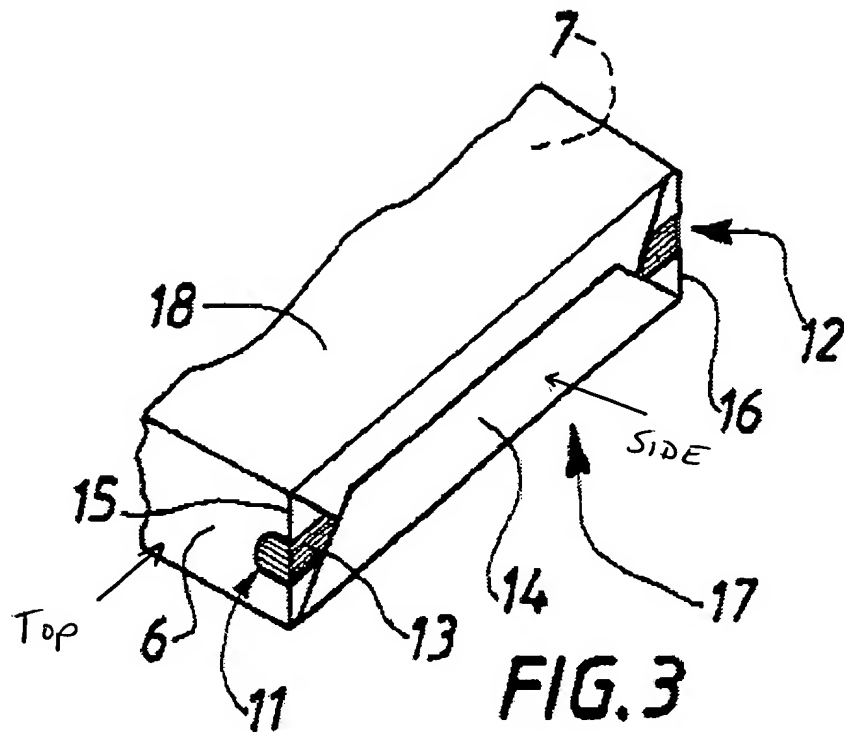

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chaperot et al (EP 0 831 032 A1).

Regarding claim 1, Chaperot et al discloses a ream wrap (Figures 1-3) comprising a paper poly coated composite (1) having transparent, solid plastic film windows (3, 4, 9, 10). The ream wrap of Chaperot et al allows for the viewing of the top of the paper contained and multiple sheets of paper (see below).

As to claim 3, Chaperot et al discloses windows cut into the top and side of the ream wrap (see below).

Claim Rejections - 35 USC § 103

4. Claim 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chaperot et al.

Chaperot et al, as applied to claim 1 above, discloses the claimed invention except for the plurality of holes on the top of the ream wrap. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a second hole on the opposite end of the top side (see Figure 2) in order to enhance the number of display orientations available. Such a modification would have been a mere duplication of parts. It has been held that mere duplication of the essential working

Art Unit: 3728

parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

5. Claims 6, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chaperot et al in view of Gatewood et al (US 2002/0050119 A1).

Regarding claims 8 and 10, Chaperot et al, as applied to claims 1 and 7 above, discloses the claimed invention except for the film covering the entire paper material.

Gatewood et al discloses a clear film laminated to a paper backing in order to increase the strength of the wrap (see for example paragraphs [0030] and [0034]). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the film of Chaperot et al cover the entire paper material as taught by Gatewood et al in order to increase the strength of the wrap.

As to claim 8, the wrap of Chaperot-Gatewood discloses the claimed basis weight (see Gatewood et al, paragraph [0029]).

As to claim 6, the wrap of Chaperot-Gatewood discloses the claimed method by presentation.

Response to Arguments

6. Applicant's arguments filed October 28, 2003 have been fully considered but they are not persuasive. The applicant's two main arguments are that Chaperot et al does not disclose a window viewing the top of the ream wrap and that none of the prior art references teaches the film covering the entire surface of the wrap. As shown above,

Art Unit: 3728

Chaperot et al does indeed disclose placing a window on top of the ream wrap. Further, the placement of a film over the entire surface of the wrap was know in the art at the time the invention was made, as evidenced by Gatewood et al.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
